

WARNING: Make sure to cycle the battery pack before charging. For initial charging, set the charge current to 120 mAh and charge for 14hrs.

 **RECYCLE THE BATTERY PACK!**

 **DO NOT DISPOSE OF IN FIRE!**

WARRANTY

A new, unused battery pack is guaranteed against manufacturer's defects and workmanship. Any damage due to misuse by the user will be repaired at the user's expense. XRAY assumes no liability for damages that arise from use or misuse of the battery pack.

MICRO BATTERY PACK The 5-cell receiver battery pack features high-capacity 1200mAh NiMH 2/3A cells give excellent performance.

BATTERY MAINTENANCE

To achieve maximum performance of the batteries and ensure reliability, please follow these instructions:

Charging

- We strongly recommend using a high-quality peak-detection charger with automatic shut-off.
- The charger should be specifically designed for charging rechargeable nickel metal hydride (NiMH) cells.
- For initial charging, set the charge current to 120 mAh and charge for 14 hrs.
- During charging it may happen that the charger will stop charging while the battery pack is not fully charged. In such case you can continue charging until the battery pack is fully charged. This may happen one or more times during charging and this issue is related to the type of charger or type of charging used.
- For rapid charging, set the charge current to 1.2 maps. If rapid charging is done at a higher current, the battery pack may generate too much heat and explode or vent.
- Never leave the battery pack unattended while it is charging.
- If the battery pack becomes too hot (113°F or higher), stop charging immediately.

Slow charge (initial): 120 mAh x 14 hours Rapid charge: 1.2 maps x 1 hour

Discharging and Storage

After use, we do not recommend discharging the pack completely, as this will damage the pack. You can safely recharge the pack immediately after use without any performance degradation. If you will be storing the pack for longer than a few days, partially discharging the pack down to approximately 40% capacity.

TIP

IMPORTANT WARNINGS

- This battery pack is for M18 and XB8. Do not use it for any other purposes.
- Never disassemble the battery pack or peel away the cover.
- Keep the battery pack away from water.
Do not touch the battery pack with wet hands or objects.
- Do not subject the battery pack to strong impacts and short circuits.
- Keep the battery pack away from fire and flammable objects.
- Disconnect the battery pack when it is not in use.
- Do not put metal objects in the battery pack connector or touch the terminals in the connector.
- Do not throw away the battery pack when you no longer need it.
Bring it to the shop you bought it at, or to a shop offering battery recycling service.
- If leaked battery acid gets in your eyes or on your skin,
flush thoroughly with clean water and consult with a doctor immediately.

Regularly check the wiring for damage. While running the car, vibration or movement may cause damage to the wires which if left unchecked may result in a short circuit. If any wire insulations becomes damaged, please dispose of the battery pack properly and do not use it, nor try to repair it. You are responsible for the proper use of this battery pack and any damage that may occur due to its use or misuse. XRAY is not liable for any injury, damage, or harm caused to any person or property arising from the use or misuse of their products.

If you have any questions, please do not hesitate to contact XRAY at info@teamxray.com or visit our website at www.teamxray.com for news and updates.
