

XRAY T2

#302655 BALL END 4.9MM WITH THREAD 10MM (2)

The new ball ends are developed for higher roll center use. Due to the length of the thread on the new ball ends, a minimum 4mm shim must be used in the rear and a minimum 2mm shim in the front.

The new #302661 closed ball joints must be used with the new #302655 ball ends (optional ball ends are #302654 with 8mm thread and #302653 with 6mm thread). However, the new ball ends are designed to be used with standard #302660 open ball joints as well.
