

XRAY RX8

#341182 BRASS CHASSIS WEIGHT FRONT 60G

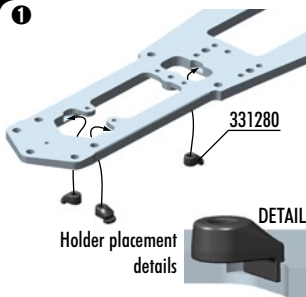

The front brass chassis weight has two mounting alternatives.

FLEX ALTERNATIVE: Mount the front weight on the chassis using plastic holders to keep the same chassis flex. Recommended for low-medium traction tracks.

FIX ALTERNATIVE: Mount the front weight directly to chassis to make the front stiffer and reduce chassis flex. Recommended for medium-high traction tracks.

FLEX Alternative

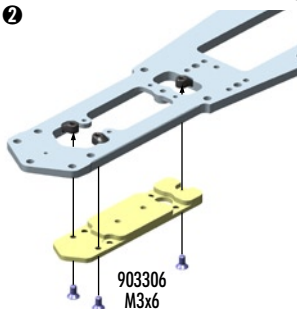

1

HINT: Use tweezers to install the composite holders.
