## SECURING PIVOT BALLS TECH TIP

### REAR SUSPENSION

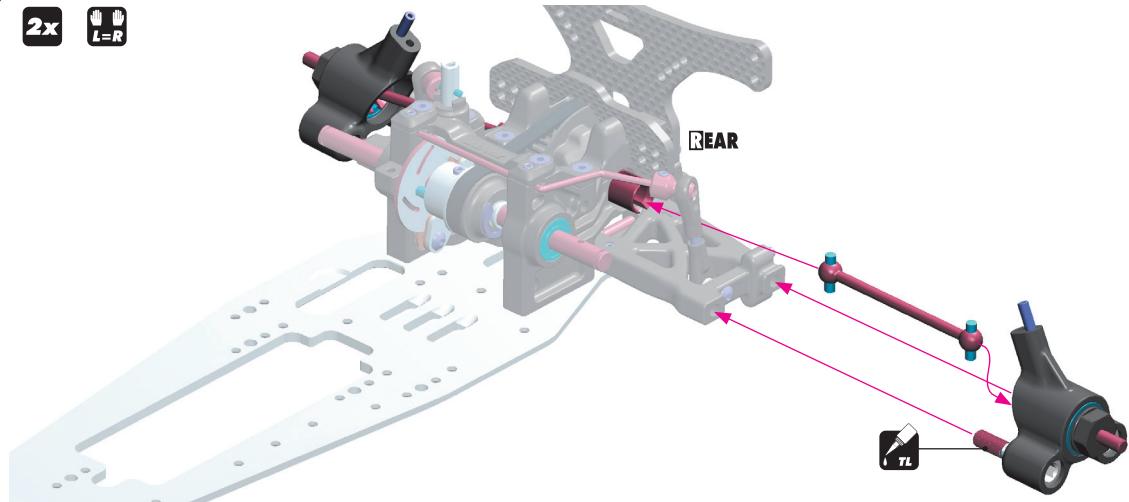

2x L=R

To ensure that the alum nuts do not loosen, you may apply a very small amount of medium (blue) threadlock to the outside threads of the nut. This will help to secure it in the hub.

### REAR SUSPENSION

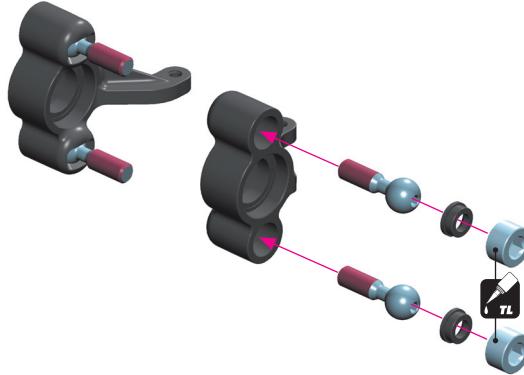

2x L=R

To ensure that the pivot balls do not loosen, you may apply a very small amount of medium (blue) threadlock to the outside threads of the pivot balls. This will help to secure it in the arm.

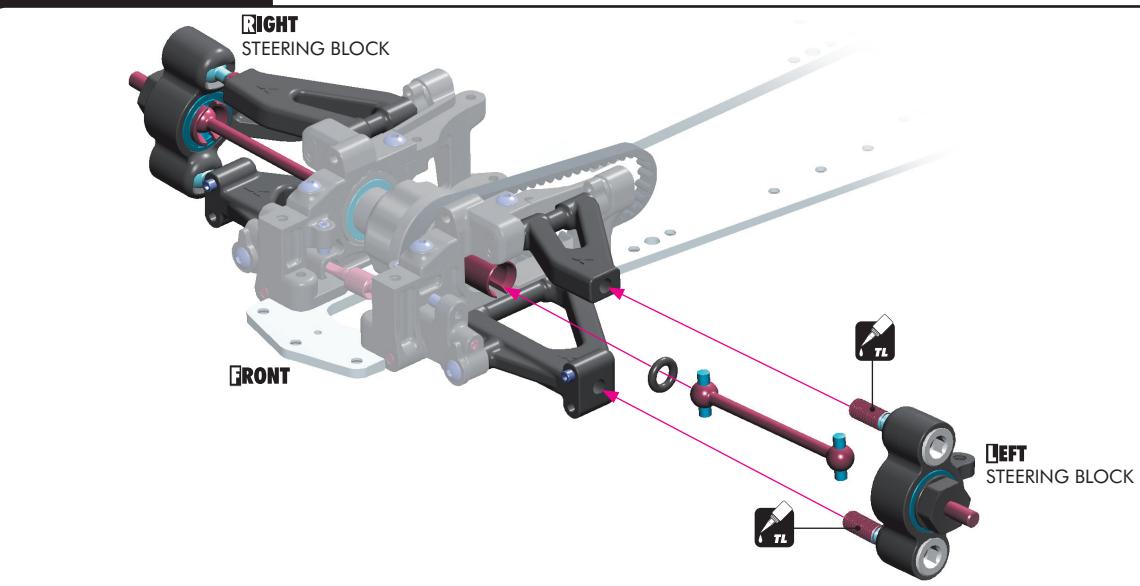

### FRONT SUSPENSION

2x L=R

To ensure that the alum nuts do not loosen, you may apply a very small amount of medium (blue) threadlock to the outside threads of the nut. This will help to secure it in the steering block.

### FRONT SUSPENSION

To ensure that the pivot balls do not loosen, you may apply a very small amount of medium (blue) threadlock to the outside threads of the pivot balls. This will help to secure it in the steering block.
