

XRAY presents new height-adjustable body posts for the T2 and NT1. For serious racers who focus on small details, body height plays a very important role in the performance of the car and as such ultra-fine body height tuning was developed by XRAY R&D engineers to address this increasingly important tuning set-up feature.

The body posts are a direct replacement for the standard body posts in the T2 and NT1, while the body holders have the elevated mounting. This makes body height adjustment very easy and comfortable. In a few short seconds and clicks, you can exchange the body holders to adjust body height.

There are two different body-height adjustment possibilities: +1mm and +2mm. The new body-height adjustable body posts are available separately in a pair of front and rear, allowing for independent front and rear body height adjustments. Looking for cutting edge, fine-tuning adjustment? Now you have it.

HEIGHT-ADJUSTABLE BODY MOUNT SETS

REAR BODY MOUNT SET **+1MM** HEIGHT

#301334

REAR BODY MOUNT SET **+2MM** HEIGHT

The body mount set includes extra robust 6mm-thick bodyposts moulded from special XRAY composite material which is ultra lightweight yet very durable and flexible to minimize breakage if the car flips or crashes. The beefy body posts are easily mounted to the car and include the necessary hardware to mount the body holders. For easy identification the new height adjustable body holders have been stamped +1 or +2mm for instant recognition. Easy and smart.
