

XRAY TENT INSTRUCTION MANUAL

01

When not in use, keep your XRAY Tent in it's handy, convenient storage bag.

02

Unpack the contents of the storage bag close to the area where you plan to set up the tent. Make sure you have all parts of the tent.

03

Place the tent frame upright in the area to be shaded.

04

Setting up the tent is most easily accomplished with 2 or more people. Expand the tent frame by pulling opposing legs away from each other. The tent frame will expand outward and the trusses will move up the legs. Be careful that you do not pinch your fingers!

05

When the tent is fully expanded, each of the 4 corner sliders should lock into place on its tent leg.

Make sure the spring pin pops out **BELOW** each corner slider as shown.

06

Fully extend all 4 tent legs, making sure the locking pins pop out into place.

07

Set up the promotional material inside the tent as appropriate.

08

Depending on the surface the tent is on, you may secure the tent in various manners.

If the tent is on soft ground, drive stakes into the ground through the holes in the bottom feet.

Each corner of the fabric tent has an eyelet for attaching a cord. Attach a cord between a stake in the ground and the fabric tent eyelet; tighten as appropriate.
