1/12 PAN CAR

XRAY X12

In the world of the small, agile, and super-fast 1/12 pancars, winners are separated from the rest of the pack sometimes by only fractions of a second. With simpler designs compared to larger touring cars, attention to detail is paramount.

The new XRAY X12 may at first glance seem like a simple and traditional design, but that's where the similarities end. The XRAY X12 achieves a state of perfection by focusing on well thought-out refinements to create a car that is easy to drive, work on, and adjust.

Direct feedback from factory team drivers, as well as customers from around the world, allowed the XRAY factory to turn a concept into reality... this is what we do best at XRAY.

Designed in virtual reality using the world's most sophisticated CAD tools, and manufactured using the world's best machining and molding machinery, the X12 achieves a level of premium perfection in all details that is second to none. All parts are purpose-designed and manufactured by XRAY, so all parts fit and work perfectly together.

In a world where overly-complicated designs hinder rather than enhance, the X12 stands alone and ahead as the best performing out-of-the-box racer.
